- MAIN has never decreased its monthly dividend rate
- 95% increase in monthly dividends from \$0.33 per share paid in Q4 2007 to declared dividends of \$0.645 per share for Q1 2022

MAIN Strategy Produces Differentiated Returns

Enhanced Value Proposition - Three Ways to Win are Better Than One

1. Sustain and Grow Dividends

- Efficient operating structure provides operating leverage to grow Distributable Net Investment Income (DNII)⁽¹⁾, and dividends paid, as investment portfolio and total investment income grow
- 95% increase in monthly dividends from \$0.33 per share paid in Q4 2007 to declared dividends of \$0.645 per share for Q1 2022
- Never decreased regular monthly dividends (including through 2008/2009 recession and 2020/2021 COVID-19 pandemic)
- Paid or declared \$32.82 per share in total dividends since October 2007 IPO at \$15.00 per share (\$28.68 per share in regular dividends and \$4.14 per share in supplemental dividends)
- Multi-faceted investment strategy supports growth of dividends over various cycles and markets

2. Meaningfully Grow Net Asset Value (NAV) Per Share

- \$12.85 at December 31, 2007 to \$24.27 at September 30, 2021 – 89% growth; CAGR of 4.7%
- Represents incremental economic return to investors beyond dividends
- MAIN's debt-focused peers (which comprises most BDCs) cannot generate NAV per share growth through the cycles
- Unrealized appreciation is a good proxy for future dividend growth without the need for additional capital through growing portfolio dividend income and periodic harvested realized gains from equity investments
- Ability to grow NAV per share provides opportunity for MAIN stock share price appreciation and additional shareholder returns

3. Supplement Growth in DNII⁽¹⁾ with Periodic Realized Gains

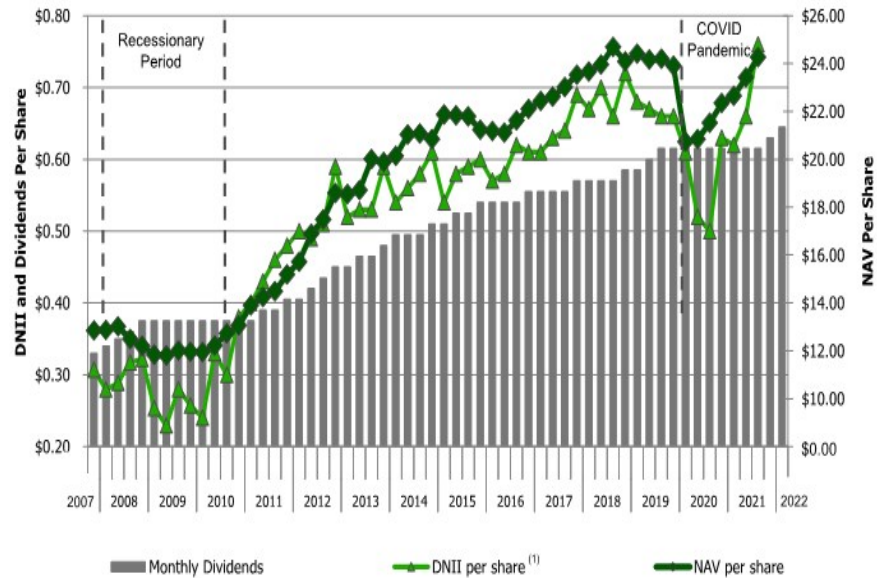

- LMM equity component of investment strategy provides opportunity for meaningful realized gains (analogous to PIK income on debt investments from cash flow perspective, but more tax efficient and without cap on upside)
- Realized gains validate the quality of MAIN's unrealized appreciation
- Realized gains can be paid to shareholders as dividends or retained for future reinvestment due to MAIN's unique tax structure

(1) See reconciliation of DNII per share to Net Investment Income per share on page 37 and Non-GAAP Information disclosures on page 47 of this presentation

Historical Monthly Dividends, NAV and DNII⁽¹⁾ Per Share

MAIN's unique focus on equity investments in the Lower Middle Market provides the opportunity for significant NAV per share growth

MAIN's efficient operating structure provides significant operating leverage, greater dividends and greater overall returns for our shareholders

- In addition to the monthly dividends above, \$4.14 per share of supplemental dividends have been paid or declared
- Annual return on equity averaging approximately 13.4% from 2010 through the third quarter of 2021

(1) See reconciliation of DNII per share to Net Investment Income per share on page 37 and Non-GAAP Information disclosures on page 47 of this presentation

Lower Middle Market (LMM) Investment Strategy

LMM investment strategy differentiates MAIN from its competitors and provides attractive risk-adjusted returns

Investment Objectives

- High cash yield from secured debt investments (10.7% weighted-average cash coupon as of September 30, 2021); plus
- Dividend income and periodic capital gains from equity investments

Investments are structured for (i) protection of capital, (ii) high recurring income and (iii) meaningful capital gain opportunity

Focus on self-sponsored, “one stop” financing opportunities

- Partner with business owners and entrepreneurs
- Recapitalization, buyout, growth and acquisition capital
- Extensive network of grass roots referral sources
- Strong and growing “Main Street” brand recognition / reputation

Provide customized financing solutions

Investments have low correlation to the broader debt and equity markets and attractive risk-adjusted returns

LMM Investment Opportunity

MAIN targets LMM investments in established, profitable companies

Characteristics of LMM provide beneficial risk-reward investment opportunities

Large and critical portion of U.S. economy

- 195,000+ domestic LMM businesses⁽¹⁾

LMM is under-served from a capital perspective and less competitive

Inefficient asset class generates pricing inefficiencies

- Typical entry enterprise values between 4.5X – 6.5X EBITDA
- Typical entry leverage multiples between 2.0X – 4.0X EBITDA to MAIN debt investment

Partner relationship with the management teams of our portfolio companies vs. a “commoditized vendor of capital”

(1) Source: U.S. Census 2017 – U.S. Data Table by Enterprise Receipt Size; 2017 County Business Patterns and 2017 Economic Census; includes Number of Firms with Enterprise Receipt Size between \$10,000,000 and \$99,999,999

Private Loan Investment Strategy

Private Loan portfolio investments are primarily debt investments in privately held companies which have been originated through strategic relationships with other investment funds on a collaborative basis, and are often referred to in the debt markets as “club deals”

Investment Objectives

- Access proprietary investments with attractive risk-adjusted return characteristics
- Generate cash yield to support MAIN monthly dividend

Investment Characteristics

- Investments in companies that are consistent with the size of companies in our LMM and Middle Market portfolios
- Proprietary investments originated through strategic relationships with other investment funds on a collaborative basis
- Current Private Loan portfolio companies have weighted-average EBITDA of approximately \$47.3 million⁽¹⁾

Investments in secured debt investments

- First lien, senior secured debt investments
- Floating rate debt investments

8% – 12% targeted gross yields

- Weighted-average effective yield⁽²⁾ of 8.4%⁽³⁾
- Net returns positively impacted by lower overhead requirements and modest use of leverage
- Floating rate debt investments provide matching with MAIN's floating rate credit facility

(1) This calculation excludes three Private Loan portfolio companies as EBITDA is not a meaningful metric for these portfolio companies

(2) Weighted-average effective yield includes amortization of deferred debt origination fees and accretion of original issue discount, but excludes fees payable upon repayment of the debt instruments and any debt investments on non-accrual status

(3) Weighted-average effective yield is calculated using the applicable floating interest rate as of September 30, 2021

Middle Market Debt Investment Strategy

MAIN maintains a portfolio of debt investments in Middle Market companies

Investment Objective

- Generate cash yield to support MAIN monthly dividend

Investments in secured and/or rated debt investments

- Floating rate debt investments

Larger companies than the LMM investment strategy

- Current Middle Market portfolio companies have weighted-average EBITDA of approximately \$77.5 million

Large and critical portion of U.S. economy

- 220,000+ domestic Middle Market businesses⁽¹⁾

More relative liquidity than LMM investments

6% – 10% targeted gross yields

- Weighted-average effective yield⁽²⁾ of 7.4%⁽³⁾
- Net returns positively impacted by lower overhead requirements and modest use of leverage
- Floating rate debt investments provide matching with MAIN's floating rate credit facility

(1) Source: U.S. Census 2017 – U.S. Data Table by Enterprise Receipt Size; 2017 County Business Patterns and 2017 Economic Census; includes Number of Firms with Enterprise Receipt Size between \$10,000,000 and \$1,000,000,000

(2) Weighted-average effective yield includes amortization of deferred debt origination fees and accretion of original issue discount, but excludes fees payable upon repayment of the debt instruments and any debt investments on non-accrual status

(3) Weighted-average effective yield is calculated using the applicable floating interest rate as of September 30, 2021

Asset Management Business

MAIN's asset management business represents additional income diversification and the opportunity for greater shareholder returns

MAIN's internally managed operating structure provides MAIN's shareholders the benefits of this asset management business

- MAIN⁽¹⁾ historically received 50% of the total management fees and incentive fees paid by MSIF
 - Base management fee of 2% of total assets
 - Incentive fees – 20% of net investment income above a hurdle rate and 20% of net realized capital gains

- MAIN⁽¹⁾ receives 100% of the management fees and incentive fees

Stable, Long-Term Leverage – Significant Unused Capacity

MAIN maintains a conservative capital structure, with limited overall leverage and low cost, long-term debt

Capital structure is designed to correlate to and complement the expected duration and fixed/floating rate nature of investment portfolio assets

Facility	Interest Rate	Maturity	Principal Drawn

(1) As of September 30, 2021, MAIN's credit facility had \$855.0 million in total commitments with an accordion feature to increase up to \$1,200.0 million; Borrowings under this facility are available to provide additional liquidity for investment and operational activities

(2) Revolver rate reflects the rate based on LIBOR as of September 30, 2021 and effective as of the contractual reset date as of October 1, 2021

(3) MAIN's Credit Facility is fully revolving until April 2025, with a maturity date thereafter in April 2026

(4) MAIN issued an additional \$200.0 million of the 3.00% Notes in October 2021

(5) MAIN's SBIC licenses provide for total SBIC debenture capacity of \$350.0 million

Long-term Maturity of Debt Obligations

MAIN's conservative capital structure provides long-term access to attractively-priced and structured debt facilities

- Allows for investments in assets with long-term holding periods / illiquid positions and greater yields and overall returns
- Provides downside protection and liquidity through economic cycles
- Allows MAIN to be opportunistic during periods of economic uncertainty

(1) As of September 30, 2021, MAIN's credit facility had \$855.0 million in total commitments with an accordion feature to increase up to \$1,200.0 million; Borrowings under this facility are available to provide additional liquidity for investment and operational activities; MAIN's Credit Facility is fully revolving until April 2025, with a maturity date thereafter in April 2026

(2) Issued in November 2017; redeemable at MAIN's option at any time, subject to certain make-whole provisions

(3) Originally issued in April 2019 with follow-on issuances in December 2019 and July 2020; redeemable at MAIN's option at any time, subject to certain make-whole provisions

(4) Issued in January 2021; redeemable at MAIN's option at any time, subject to certain make-whole provisions; MAIN issued an additional \$200.0 million of the 3.00% Notes in October 2021

Interest Rate Impact and Sensitivity

While MAIN's financial results are subject to significant impact from changes in interest rates, upside is greater than downside due to majority fixed rate debt obligations and majority floating rate debt investments with minimum interest rate floors

- 87% of MAIN's outstanding debt obligations have fixed interest rates⁽⁵⁾, limiting the increase in interest expense
- 67% of MAIN's debt investments bear interest at floating rates⁽⁵⁾, the majority of which contain contractual minimum index rates, or "interest rate floors" (weighted-average floor of approximately 110 basis points)⁽⁶⁾
- Provides MAIN the opportunity to achieve significant increases in net investment income if interest rates increase, with limited remaining negative impact if interest rates decrease

The following table illustrates the approximate annual changes in the components of MAIN's net investment income due to hypothetical increases (decreases) in interest rates⁽¹⁾⁽²⁾ (dollars in thousands):

Basis Point Increase (Decrease) in Interest Rate	Increase (Decrease) in Interest Income	(Increase) Decrease in Interest Expense ⁽³⁾	Increase (Decrease) in Net Investment Income	Increase (Decrease) in Net Investment Income per Share ⁽⁴⁾

(1) Assumes no changes in the portfolio investments, outstanding revolving credit facility borrowings or other debt obligations existing as of September 30, 2021

(2) Assumes that all LIBOR and prime rates would change effective immediately on the first day of the period; However, the actual contractual LIBOR rate reset dates would vary in future periods generally on either a monthly or quarterly basis across both the investments and our revolving credit facility

(3) The hypothetical (increase) decrease in interest expense would be impacted by the changes in the amount of debt outstanding under our revolving credit facility, with interest expense (increasing) decreasing as the debt outstanding under our revolving credit facility increases (decreases)

Non-GAAP Information

Distributable net investment income is net investment income, as determined in accordance with U.S. generally accepted accounting principles, or U.S. GAAP, excluding the impact of share-based compensation expense which is non-cash in nature. MAIN believes presenting distributable net investment income and the related per share amount is useful and appropriate supplemental disclosure of information for analyzing its financial performance since share-based compensation does not require settlement in cash. However, distributable net investment income is a non-U.S. GAAP measure and should not be considered as a replacement for net investment income and other earnings measures presented in accordance with U.S. GAAP. Instead, distributable net investment income should be reviewed only in connection with such U.S. GAAP measures in analyzing MAIN's financial performance.

Net Debt to NAV Ratio is calculated as the Debt to NAV Ratio as determined in accordance with U.S. GAAP, except that total debt is reduced by cash and cash equivalents. The **Non-SBIC Debt to NAV Ratio** is calculated in the same manner as the Debt to NAV Ratio, except that outstanding SBIC debentures are excluded from the debt pursuant to an exemptive order Main Street received from the Securities and Exchange Commission. Main Street believes presenting the Net Debt to NAV Ratio is useful and appropriate supplemental disclosure for analyzing its financial position and leverage. Main Street believes presenting the Non-SBIC Debt to NAV Ratio is useful and appropriate supplemental disclosure because Main Street, a business development company, is permitted to exclude such borrowings from its regulatory asset coverage ratio calculation pursuant to an exemptive order received from the Securities and Exchange Commission. However, the Net Debt to NAV Ratio and the Non-SBIC Debt to NAV Ratio are non-U.S. GAAP measures and should not be considered as replacements for the Debt to NAV Ratio and other financial measures presented in accordance with U.S. GAAP. Instead, the Net Debt to NAV Ratio and the Non-SBIC Debt to NAV Ratio should be reviewed only in connection with such U.S. GAAP measures in analyzing Main Street's financial position.
